History Of Nicaragua, Precolonial Period: Colonial Period, 1522-1820, Government, Politics, Economy, People
Throughout its history, Nicaragua has suffered from political instability, civil war, poverty, foreign intervention, and natural disasters. Governments since colonial times have been unable to bring stability and sustainable economic growth. Personal and foreign special interests have generally prevailed over the national interests, and foreign intervention in Nicaraguan political and economic affairs, especially by the United States, has resulted in various forms of populist and nationalist reactions. The legacy of the past can be seen today in the attitudes toward foreign influence. Although the upper and middle classes tend to emulate North American life-styles and be supportive of United States policies, the Nicaraguan poor are highly suspicious of the culture and political intentions of the United States.

**Synopsis**

Government, Economy, Politics and People History of Dominica, British Virgin Island: Government, Politics, Economy, People
