## Customer Reviews

This was a very good resource for cross referencing issues with several facilities in the Colorado area. Some of the Fire Departments are leaning more heavily on the IFC for some applications, while still using the 2009 and 2012 NFPA 99 and 55. It is a struggle to work for LTC's and know exactly how to advise them on Oxygen storage issues without first getting the language down to work with the different Fire Marshals and HazMat Officers. This helped a lot.

This edition covers all of the changes for the 2009 edition of the International Fire Code. It is a very good reference book for those involved in code work when following the 2009 edition.

just as expected

Ordered the set for work. This is the least expensive price I found and free shipping.
