Good variety of pictures to color - the designs are of people, places, animals, food. The paper is good quality. The pages are one sided which is a plus - this book is similar to a U.K. magazine's designs - You're Never Too Old To Colour By Number, but this magazine is double sided. The design spaces are small, so may have to use a magnifying glass for some, but the outlines and numbers are dark enough to see. I like this book because it has so much to choose from and the finished examples are in the back. The color chart for all pictures is in the front. (some books have a separate color chart for each picture). I like the color-by-number because I often do not know what colors to use.
